

Welcome to the digital revolution! Facebook, social media, digital images and Big Data are changing our world at a rapid pace. But what does this mean for our society, our language and our use of images? How do these developments influence our forms of organization and decision-making, as well as our spatial relations?

The humanities and social sciences are challenged to explore this profound social change and to understand the socio-technical preconditions of digitization. The Digital Humanities and Social Sciences have emerged as a new field of research and offer numerous new methodological possibilities.

Discover the fascinating world of Digital Humanities and Social Sciences and be inspired by the latest findings and developments!

Facebook, social media, digital images, Big Data – in the context of the so-called digital revolution, social relationships, language and the use of images are changing. Forms of organization and decision-making, social spatial relations, etc. are being questioned and reconfigured. The humanities and social sciences, which deal with all aspects of human society, art and culture, language and history, with processes of thinking and communication, are challenged to also explore this profound social change and to understand the socio-technical preconditions of digitalization. At the same time, digital technologies also open up numerous new methodological possibilities for the humanities and social sciences themselves. Accordingly, the Digital Humanities and Social Sciences have emerged as a new field of research. The program forms an interface between the humanities and social sciences and information technology. The concept is interdisciplinary and interdisciplinary: In your studies, you will deal with concepts and technologies of digitalization and acquire

Individual study topics include:

Bewerbung für zulassungsfreie Studiengänge

Digitale Geistes- und Sozialwissenschaften

FAU – Moving Knowledge

The following modules are foreseen:

The study program "Digital Humanities and Social Sciences" qualifies graduates for various professional activities. The methods they learn enable them to develop new ways of thinking and working, which, depending on the combination of subjects, open up a variety of perspectives in exciting, dynamically growing fields of research and work at the intersection of technology, society and culture, such as: Memory institutions (museums, archives, libraries), publishing houses and other media companies (e-publishing and digital markets), journalism (online media, social media), museums, archives and libraries (image/work annotation, databases), public relations and cultural education (internet and new media), education (development of interactive teaching materials and teaching systems, e-learning). Completion of the BA program also provides access to various Master's programs in the field of Digital Humanities.

Das Lehrangebot dieser Kombination ist so aufeinander abgestimmt, dass die Fächer in der Regel überschneidungsfrei miteinander kombiniert werden können.

Diese Kombination kann nur nach einer diesbezüglichen Studienberatung studiert werden.

Die Überschneidungsfreiheit kann jedoch nicht garantiert werden.

Die Studierenden tragen selbst die Verantwortung für die Studierbarkeit der Kombination

und die Einhaltung der Fristen des § 10.

Der Nachweis einer Studienberatung ist bei der Immatrikulation vorzulegen.

30.09.
